Back-end -Nodejs ,Django
Back-end Frame work - Express
Modules- Passport,Nodemon
Database- MongoDB
Tools used- git,formspree
Deployment-Heroku , PythonAnywhere

Guide for Student

Students will signup and their profile will be displayed on website. Users can explore the comment section where they can post or refer to other queries and can reply. If users are interested in taking mentorship then they can visit mentor section where profiles of registered mentors are displayed.

If user wants to take mentorship of desired mentor then user can move to affiliated page where user should register as a student. On website user can explore various options provided and then access the subject contents uploaded by respective mentors of the subjects.

Guide for Mentor

If any users wants to enroll as a mentor, select "Register as Mentor" option where they get redirected to a google form to fill the required details. Once this gets completed user gets reply from the admin who provides an user id and password to login. Now mentor gains access to upload content according to his/her allocated expertise

DISCOVER. CONNECT. GET INSPIRED.
